Office Asticus Communication	10/849,282	MOLDENHAUER, MAXINE G.				
Office Action Summary	Examiner	Art Unit				
	San-ming Hui	1617				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1617

DETAILED ACTION

Claims 1-5 are presented for examination.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitation "hydrophilic surfactant having an HLB value of <u>less than 10</u>" recited in claim 1 is not supported by the originally filed specification. The instant specification only discloses "hydrophilic surfactant having an HLB value of <u>greater than 10</u>" (See e.g., page 2, line 23).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 1617

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 5,696,105 ('105).

'105 teaches topical cream composition comprising 0.01 to 0.25% or 0.05 to 0.15% of mometasone.furoate, Hexylene glycol, 1-5% of purified water, 2 to 10% of white wax, 4-12% of lipophilic surfactant having HLB value below 5 and 0.7 to 4% of a hydrophilic surfactant having HLB value above 11 such as ceteareth-20, 0.2-2% of titanium Dioxide, 5-20% of aluminum starch octenylsuccinate, 40-70% of White Petrolatum, and sufficient phosphoric acid to adjust the pH (See col. 4, lines 15-30). '105 also teaches a topical lotion formulated using a hydro-alcoholic base comprising 10-50% of propylene glycol (See col. 3, lines 32-46; col. 5-7, Examples 1-5).

'105 does not expressly teach the viscosity of the composition as about 400,000 to about 900,000 centipoise. '105 does not expressly teach the topical composition having propylene glycol instead of hexylene glycol.

It would have been obvious to one of ordinary skill in the art at the time of invention to incorporate propylene glycol for hexylene glycol in the mometasone topical

Art Unit: 1617

composition. It would have been obvious to one of ordinary skill in the art at the time of invention to adjust the viscosity of the mometasone topical composition.

One of ordinary skill in the art would have been motivated to incorporate propylene glycol for hexylene glycol in the mometasone topical composition. Propylene glycol is known to be useful in formulating a mometasone topical composition. Since propylene glycol is a well-known hydro-alcoholic base for topical composition, one of ordinary skill in the art would see the substitution of propylene glycol for hexylene glycol as selection among the obvious alternatives. Furthermore, the optimization of the effect parameter (e.g., viscosity for topical composition) would be obvious as being within the purview of skilled artisan.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to San-ming Hui whose telephone number is (571) 272-0626. The examiner can normally be reached on Mon 9:00 to 1:00, Tu - Fri from 9:00 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreeni Padmanabhan, PhD., can be reached on (571) 272-0629. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
